Use-Case Flow Specification

Use Case: UC-02 — Book Interview Slot

Primary Actor: Podcast Guest

Supporting Actor: Calendar/Notification Service

Preconditions

1. The podcast guest has access to the podcast scheduling system.
2. The show host has created at least one available interview time slot.
3. The selected interview slot has not already been booked or blocked.

Postconditions

1. The selected interview slot is marked as booked.
2. The booking is associated with the podcast guest and the episode.
3. A booking confirmation and calendar invitation are sent to the guest.
4. The booked slot is no longer available for other guests.

Main Success Scenario

1. The Podcast Guest opens the interview booking page.
2. The system displays the interview time slots currently available.
3. The Podcast Guest selects a preferred available time slot.
4. The system verifies that the selected slot is still available.
5. The Podcast Guest confirms the selected interview slot.
6. The system creates and saves the interview booking.
7. The system marks the selected time slot as unavailable to other guests.
8. The system includes the **Send Booking Confirmation** use case.
9. The Calendar/Notification Service sends the guest a booking confirmation and calendar invitation containing the interview date and time.

10. The system displays a successful booking confirmation to the Podcast Guest.
11. The use case ends successfully.

Alternate Flow — Selected Slot Is No Longer Available

4a. Selected time slot is unavailable

1. The system detects that the selected slot has already been booked or blocked.
2. The system informs the Podcast Guest that the selected time slot is no longer available.
3. The system displays the currently available interview slots.
4. The Podcast Guest selects another available slot.
5. The flow returns to Step 4 of the Main Success Scenario.

If no suitable slot is selected, the booking process is cancelled and no booking is created.
